<u>FOR IMMEDIATE RELEASE</u>

DARTECH, Inc. Releases DART® Pro MT

New Audio Tool for Eliminating Noise in Recordings Now Available

DART Pro MT™ is a powerful tool used for maximizing audio quality for music and speech, new and old recordings. DART Pro MT is the latest in a succession of many releases spanning 15 years of DART® products. This is the first DART product to run with Windows Vista®.

This product has new features including DART DeClick MT™, DART DeCrackle MT™, DART DeNoise MT™, DART DeHiss MT™, DART MaskNoise MT™ that runs much faster on Multi-core systems. DART uses advanced multi-threading technology to achieve simultaneous execution on all CPUs in a multi-CPU system resulting in much faster execution times.

The DART programs use their own advanced Digital Signal Processing (DSP) algorithms that are the best in the audio industry. DART Pro MT includes all of the previous tools found in DART Pro 24™. DART Pro MT is expected to be used heavily by audio professionals and experienced audio hobbyists worldwide.

All of the DART software is available for free download and 30 day trial at the DART website www.dartpro.com. Special upgrade prices are available for current DART owners. More information can be found at the DART website.
